| Prerequisites                       | Economics and statistics                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Learning outcomes                   | The aim of this course is to critically examine the linkages between<br>poverty, inequality and growth, the most relevant measurement issues<br>related to inequality and poverty analysis and their implication in terms<br>of economic and human development policies. The course is divided<br>into two teaching modules (inequality analysis and poverty analysis) and<br>integrated by workshops providing the skills required for carrying out<br>empirical analysis using Stata. |
| Course contents                     | <ul> <li>The main topics discussed in this course are: normative and positive theory of income distribution</li> <li>Positive income inequality measures and complete rankings</li> <li>Normative income inequality measures and partial orderings: Lorenz curve and axiomatic structure of normative indexes</li> <li>Theories and measures of income poverty</li> </ul>                                                                                                               |

|                                                | <ul> <li>Multidimensional poverty analysis: theory and measures</li> <li>Growth, poverty and inequality linkages in a globalizing world</li> <li>Inequalities and poverty in developed and developing countries:<br/>empirical evidence</li> </ul> |
