students a kind of corpus proficiency consisting in the ability to perform advanced searches, have a basic understanding of how to interpret concordance data and frequency information and use corpora to answer questions concerning language variation.

The course is organised as a graduate seminar where regular attendance is encouraged and where course participants are expected to read their reading assignments on a regular basis and come to class ready to discuss them.

The first part of the course is based on the set text *Linguistica dei Corpora*, Carocci (see bibliography). For this part especially, regular readings are assigned after each class. In the second part, students are expected to choose from one of the five following areas and present a case-study to acquire further specialisation: 1) specialised corpora and EAP/ESP; 2) phraseology and theory of collocation; 3) corpora and syntax; 4) corpus stylistics; 5) web as corpus.

Extra classes on oral academic skills are scheduled in the two-terms of each semester run by a Collaboratore ed Esperto Linguistico (dr. Robert Ponzini). Classes will include tasks and activities of the following type: academic orientation, oral presentation, interview. For the timetable, please contact dr. Ponzini directly (through the web page cla.unipv.it).
